

W14-P1: show first welcome page

W14-P2: Show static products page

=> show render page with data passed into ejs page

=> show how the product-1.jpg can be accessed fro public directory as root directory

The screenshot shows a VS Code editor with a project named 'server_xx'. The file explorer on the left shows a directory structure with 'node_modules', 'public', 'blog', 'product', 'images', 'product-1.jpg' through 'product-12.jpg', 'product.html', 'style.css', 'routes', 'api', 'ProductRouter_xx.js', 'utils', 'data', 'database.js', 'db-test.js', 'views', 'blog_xx', 'product_55', 'index.js', 'static_55.js', 'env', 'package-lock.json', 'package.json', 'server_xx.js', and 'server_xxjs'. The main editor shows the 'db-test.js' file with the following code:

```
1 import db from './database.js';
2
3 const testDB = async () => {
4   try {
5     const results = await db.query('select * from product_55');
6     console.log('results', JSON.stringify(results.rows));
7   } catch (error) {
8     console.log(error);
9   }
10 };
11
12 testDB();
13
14 export default testDB;
```

The terminal output shows the results of the database query:

```
maxfiles: Infinity,
allowExitOnIdle: false,
maxLifetimeSeconds: 0,
idleTimeoutMillis: 10000
}
